

Bio-friendly Design In Surgically Augmented Soft Tissue

Full Day Seminar

THE BIO-LOGIC PROSTHETIC INTERFACE IN MODERN ESTHETIC IMPLANTOLOGY

This full day immersion with Dr Euwe addresses the key elements on the way to excellence where-by the different pieces of implantology hardware must respect the layer specific tissue features to obtain long-lasting clinical stability.

- Dr Euwe will show you several cases revealing hidden secrets of the Transgingival area of implant supported prosthesis.
- In this intensive seminar you will learn the correct procedure to achieve esthetic excellence from a true Master of implant dentistry.

Dr Egon Euwe is one of the finest clinicians in the world of implant dentistry. Having obtained his Dental Degree in Holland in 1982 he then progressed to specialize in the new field of oral implantology. Dr Euwe is a Member of the European Academy of Esthetic Dentistry (EAED), European Association of Osseointegration (EAO), and worked in the Department of Periodontology at Milan University. His clinical ability in the field of perio-plastics is legendary.
